

TECHNOLOGICAL OFFER

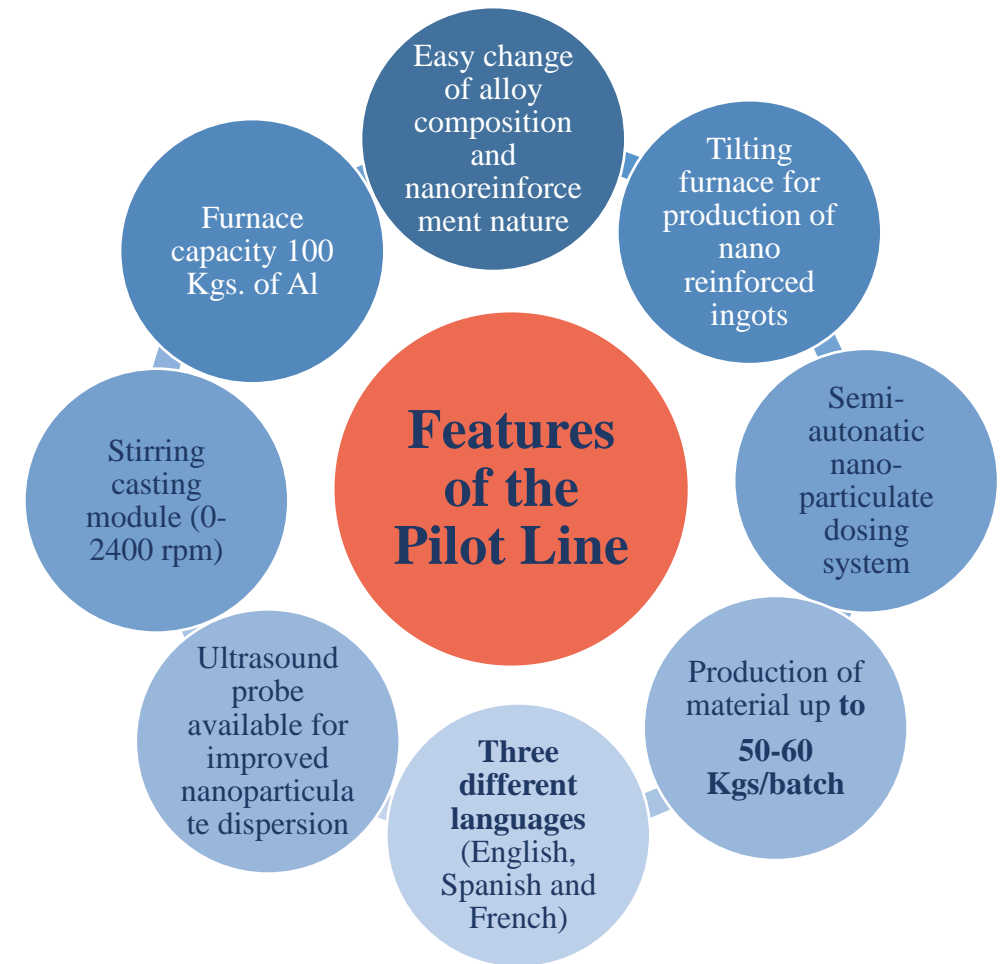

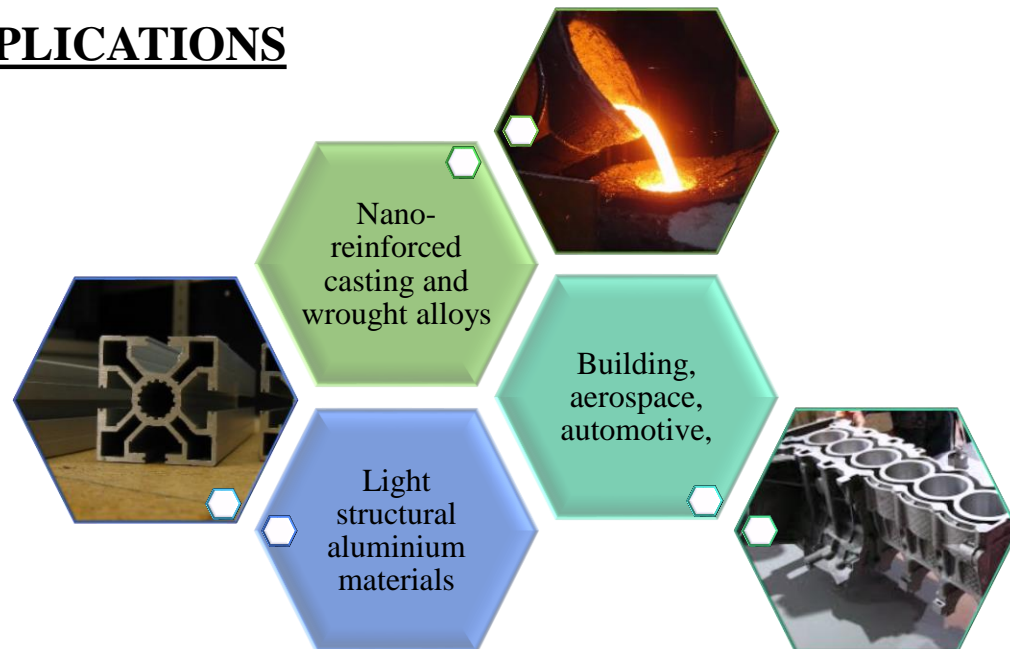

The Pilot Line can be used to:

- Develop innovative materials.
- Optimize dispersion of nanoreinforcements.
- Production of large batches in a controlled and repeatable conditions.

COMPETITIVE PRODUCTS

- Light metallic materials.
- Good performance/cost ratio.
- Capability of production of a large range of aluminium alloys and nanoreinforcements.

APPLICATIONS

UPGRADED TECHNOLOGY

- Semiautomatic nanoparticulate drying and dosing system.
- Mechanical stirring and ultrasonic modules to increase dispersion of nanoparticulates.
- Safe handling of nanopowders and melt aluminium.
